---

# COMPANY HISTORY

SAN TECH was established in August 2019 by young Rwandan Software Engineers, after their successful final year's project (E-Visitors) presentation from the University of Rwanda (UR-CST), to contribute to the national and regional IT sector, driving the technology evolution towards a next level in Rwanda and abroad. Our core concept is based into "Making ideas Happen" for Time Management consistently inspires effectiveness and efficiency services and as by using smart technology in security. SAN TECH has experienced in software development, Graphic design, computer maintenance, and Development of embedded systems (Internet of Things).

## Achievement

We won the trust of different institutions and units in both government and private sectors since the inception

## Improvement

We have developed different versions of the E-Visitors system, and we managed to launch the SAN Tech hub

## Strategies

Our top and most used strategy to expend the market is customer satisfaction, we value the satisfaction of customer and deliver a great followup to ensure the implementation
